

Alertex AirSafe Vape Sensor for Leisure Centres

Leisure Centres: A Space for Everyone

Leisure centres and clubs play an essential role in modern communities. They are designed to support health, wellbeing, and social connection, offering a wide range of facilities under one roof. From fully equipped gyms and fitness studios to swimming pools, spa areas, sports courts, and leisure centres cater to people of all ages and lifestyles. Many leisure clubs also include yoga and aerobics halls, indoor sports areas, cafés, making them busy shared environments throughout the day. These spaces are built to promote an active, healthy way of life — and maintaining a safe, clean atmosphere is critical to that mission.

The Growing Issue of Vaping in Leisure Centres

Despite clear policies, vaping has become a growing concern in leisure centres and clubs. Some individuals choose to vape discreetly in changing rooms, washrooms, corridors, poolside areas, or even gym spaces, assuming it will go unnoticed.

This creates several serious issues:

- Health risks for visitors
- Poor air quality in enclosed spaces
- Discomfort and complaints from members
- Violation of safety and facility regulations
- Increased fire and alarm risks

In environments focused on physical health and clean air, vaping directly contradicts the core purpose of leisure facilities.

Alertex AirSafe Vape Sensor for Leisure Centres

A Smart Solution: Alertex Airsafe Vape Sensor for Leisure Centres

To effectively address this challenge, leisure centres need a proactive and discreet solution — and this is where the Alertex Vape Sensor makes a real difference. The Alertex Vape Sensor is designed to detect vape aerosol particles in real time, allowing staff to respond quickly before the situation escalates. It works silently in the background, helping centres enforce no-vaping policies without confrontation.

Key Benefits for Leisure Centres:

- Early detection of vaping in sensitive areas
- Improved air quality for members and staff
- Protection for children and families
- Supports compliance with health and safety standards
- Discreet, non-intrusive monitoring
- No cameras, no privacy concerns

Supporting Health, Safety, and Trust

By installing the AlertEx Vape Sensor, leisure centres and clubs demonstrate a strong commitment to member wellbeing, safety, and professionalism. Whether in gyms, swimming pool facilities, changing rooms, or shared spaces, the system helps maintain the clean, healthy environment that members expect and deserve.

Leisure centres are spaces built for movement, recovery, and community wellbeing. Addressing the issue of vaping is no longer optional — it is a necessary step in protecting users, staff, and facilities. With the Alertex Vape Sensor, leisure centres can confidently maintain a vape-free environment and continue to promote a healthier future for everyone.
